The testo 330 LL is the professional flue gas analyzer. It fulfils the highest demands and can cope with all measurement tasks on heating systems. Multiple country-specific measurement menus are stored in the instrument. It is possible to select from an extensive program of flue gas probes, which often replaces an additional measuring instrument. Other fuels can be defined by the user as desired. Apart from this, gas pipe tests or solid fuel measurement can also be carried out with the testo 330 LL.

The high-quality instrument is especially excellent thanks to the successful combination of outstanding sensor technology, long life and security. It has three high-quality measuring cells for O₂, CO and NO as well as a temperature probe integrated into the flue gas probe for the direct measurement of temperature, O₂, CO and NO. The abbreviation „LL“ stands for „Longlife“. The sensors of the instrument series testo 330 LL have an extended lifetime of up to 6 years. At least one O₂ and CO sensor replacement can be saved in the course of the typical working life.

Product properties

Longlife sensors

The sensors of the instrument family testo 330 LL have a lifetime of up to 6 years. At least one sensor replacement is saved in the course of the typical working life.

Graphic presentation of the measurement data

Fine presentation of the measurement procedures as a flue gas matrix and line diagram

Sensors exchangeable by the user

Easy exchange of the sensors by the user – no adjustment necessary

Stamp of approval

The testo 330 LL is TÜV-tested according to 1. BImSchV EN 50379, Parts 1-3, TÜV-tested solid fuel measurement for O₂ and CO.

CO dilution

In CO measurement, the automatic dilution to min. 30,000 ppm CO takes place from 8,000 ppm (only for testo 330-2 LL).

Efficient exchange of probes

Fast and easy exchange of probes via the probe coupling. All gas paths are connected to the instrument at once with the bayonet connection.

Attachment

Integrated magnets for fast attachment to burner/boiler.

Robust design

Robust and ergonomic instrument – ideally suited even to rough surroundings.

Long battery life

Powerful Li-ion rechargeable battery – no battery replacement. Up to eight hours' lifetime with pump running. Battery chargeable separately in instrument, no memory effect, no deep discharge.

**Sensor monitoring**

Integrated traffic light system which continuously monitors the sensor functionality.

**Memory**

Up to 500,000 measurement values can be saved in the memory of the testo 330 LL.

**High-resolution colour graphic display**

The measurement menus and measurement values are presented in detail and always easily legible.

**Draught and gas zeroing**

Integrated draught and gas zeroing with probe removal: the probe can remain in the flue during zeroing (only for testo 330-2 LL).

**Fast sensor zeroing**

Automatic zeroing of the sensor in only 30 seconds after start-up, and which can be cancelled if not required.

**Logger function for long-term measurements**

Logger function for easy long-term recording of the measurement curve.

**Flexibility with modular probes**

A range of probe lengths and diameters ensure a high degree of flexibility for all applications. To exchange the probe shaft, it is simply placed on the probe handle and engages.

**Condensate trap**

Integrated condensate trap – very easily emptied.

**Probe filter**

Easy exchange of probe filter.
